

ALI SADEGHI

FRONT-END ENGINEER

Hey there!

My resume is still being updated, so this version is not final yet.

A cleaner and more polished version will be available soon.

BTW, Thanks for checking out my works ;)

Node.js
Express
Prompt Engineering
AI Workflow Automation
Code Review
Technical Mentorship
Team Collaboration

EXPERIENCE

• MelkRadar, Front-End Technical Lead

August 2023 – January 2026 | Remote - Tehran, Iran

- Contributed across 6 internal products and initiatives within the MelkRadar ecosystem, owning critical UI components and delivering high-impact front-end features.
- Acted as one of the primary front-end code reviewers for 1.5 years, ensuring high code quality, maintainable architecture, and consistent styling standards.
- Enhanced the existing onboarding process and added 3 guided onboarding videos, successfully mentoring and onboarding 4 front-end engineers into the team.
- Improved the styling and visual quality of the property listings card system, one of the platform's most heavily used interfaces, enhancing usability and overall user experience.
- Served as the main bridge between design and development teams for 7 months, enabling fast, accurate, and scalable delivery of complex UI features.
- Delivered and integrated 50+ production-ready data visualizations using Chart.js under tight deadlines to address urgent product needs.
- Took ownership of learning and integrating Mapbox GL JS, then trained and onboarded the entire front-end team on its effective usage.

• CS Internship, Technical Mentor & System Designer

March 2023 – Present | Remote - Tehran, Iran

- Started as an intern and later became a technical mentor and core contributor with responsibility for designing and improving program systems and processes.
- Mentored 30+ web development interns through technical coaching and personally onboarded 8 interns into the program.
- Led the redesign of the program entry process over 6 months, initiating the core idea and acting as the main execution driver alongside the governance team ([Flowchart link](#)).
- Played a key role in scaling and improving the program by designing internal systems and restructuring workflows to support operational growth ([GitHub Org](#)).
- Designed and built 5 internal automation tools to support mentorship and program operations at scale; the 3 most widely used are listed below:

PERSONAL PROJECTS

Path-Finder

React app visualizing pathfinding with interactive grids and real-time updates (React, Ant Design, SCSS) [GitHub](#)

CS-Step0-Message-Maker

Internal React tool to simplify and automate admin updates for the CS Internship program, built with Firebase integration (React, SCSS, Firebase) [GitHub](#)

Custom Gradient Paint

Customizable web-based gradient painting application with dynamic color spreading, interactive blocks, and adjustable controls (JavaScript, HTML, SCSS) [GitHub](#)

Paper Scissor Stone Battle Royal

Real-time React battle simulation featuring interactive entities and live scoring (React, SCSS) [GitHub](#)

EDUCATION

Azad University – East Branch
Bachelor of Science in Software Engineering
September 2021 – January 2026 |
Tehran, Iran

- **CS Club Bot (Telegram):** AI-assisted educational system delivering automated feedback on interns' learning posts using structured prompts, enabling scalable mentorship with production-grade standards (TDD, CI/CD, security). [GitHub](#) - [CI/CD](#)
- **CS Queue Bot (Telegram):** Built an automation bot to manage the program queue group and automatically create Azure Boards tasks for each new member to support interview and progress tracking. [GitHub](#)
- **CS Queue Calendar (React Web App):** Production-ready React application for managing entry and interview sessions with responsive UI, Ant Design, and CI/CD-backed deployment; became one of the program's most actively used internal tools. [GitHub](#) - [Live Version](#)

● Dadeh Pardazi Azmoudeh Karan, React Developer

July 2024 – June 2025 | Remote - Tehran, Iran

- Owned the front-end development of a large-scale React application from the ground up, translating Figma designs into production-ready UI using React and Ant Design.
- Integrated and maintained 60+ APIs, focusing on performance, clean data flow, and predictable application behavior.
- Iteratively improved and refactored the codebase over 7 months to adapt to changing requirements and keep the project scalable and maintainable.

● SettleitGPT, React Native Developer (iOS App)

Apr 2025 – Sep 2025 | Remote - Los Angeles, CA, US

- Co-developed and launched an iOS application using React Native and Expo, from initial setup and architecture to production release on the Apple App Store. ([App Store](#))
- Implemented features using native iOS APIs and AI-driven personas, enabling voice and audio generation based on selected character behavior.
- Supported the product launch with a public LinkedIn introduction post that achieved strong engagement ([Launch Post](#)).
